MOHAMAD NOSRATI

Software Engineer — Web Applications & Client Architecture

🌐 **Personal Portfolio & Interactive Work: https://www.mohamadnst.ir/**

Location:**Jomhoori, Tehran, Iran** • Age:**30** • mohamadnosratidev@gmail.com • +98 912 095 8305 • github.com/MohamadNosrati • linkedin.com/in/mohamad-nosrati

PROFESSIONAL SUMMARY

Software Engineer specialized in high-performance web engineering with deep expertise in modern client-side architectures (React, Next.js, Micro Frontends, Turborepo) complemented by solid mid-level backend capabilities (Node.js, Express, Laravel, PostgreSQL, RESTful APIs, Gateway design). Experienced in engineering resilient state management flows, high-concurrency real-time interfaces, cross-platform mobile apps (React Native), and production-grade design systems.

TECHNICAL SKILLS

Frontend & Architecture:	TypeScript, JavaScript, React.js, Next.js, Micro Frontends, Turborepo, Monorepo, Webpack, Turbopack, Jest
State & Data Layer:	TanStack Query (React Query), Redux Toolkit, Zustand, Jotai, SWR, React Hook Form
UI, Mobile & Motion:	Tailwind CSS, Material UI, Hero UI, Ant Design (antd), Framer Motion, Responsive Design, React Native, Expo, PWA
Backend & Database:	Node.js, Express.js, PHP, Laravel (MVC/Eloquent), REST APIs, API Gateway Design, PostgreSQL, MySQL, MongoDB, Redis
Realtime & Tooling:	WebSockets, Socket.IO, Git Flow, GitHub, GitLab, PostHog, Docker, npm/pnpm/Yarn, CI/CD practices

PROFESSIONAL EXPERIENCE

Software Engineer (Web & Services) — Motemayez June 2026 – Present

Contract / Full-time • Project: student-assistant (cheestee.com)

- Architected and built interactive frontend applications utilizing React.js, integrated with Express.js data microservices and PostgreSQL for robust, transactional data persistence.
- Engineered and maintained a centralized API Gateway, orchestrating scalable multi-layer routing, payload transformations, and client-server security protocols.

Frontend Engineer & Technical Instructor — Ide Kavan Nov 2025 – Mar 2026

Full-time • Featured Project: Behtarino, Reval, Back-office Admin

- Engineered enterprise modular frontend interfaces and headless back-office portals utilizing Micro Frontend design patterns and automated build workflows.
- Delivered technical curricula and training on containerized deployments (Docker), enterprise Git Flow, and AI workflows (MCP servers, RAG, prompt engineering, n8n).

Frontend & Mobile Engineer — Mobtakeran Mar 2025 – Nov 2025

Part-time • Key Project: Mobedu Exam Platform (exam.mobedu.ir)

- Developed cross-platform mobile and responsive web applications with React Native and Ant Design in a unified Turborepo monorepo setup.
- Enhanced data-fetching efficiency and client-side caching by configuring SWR state synchronization across high-traffic testing modules.

Frontend Engineer — Fannvaran Tosee Amn Nov 2025 – Mar 2026

- Formulated lightweight client architectures leveraging Zustand and TanStack Query to manage complex asynchronous network states with Axios.
- Constructed rapid data capture workflows and dynamic operational dashboards using React Hook Form, Hero UI, Tailwind CSS, and ECharts visualization.

Web Applications Engineer — Sarooj Contractor Company Mar 2023 – Apr 2023

Freelance • Website: saroojcontractor.com

- Shipped performant dashboard features, patched pipeline state synchronization bugs, and created modular UI component libraries for business contractors.

Backend & Web Developer — Doctorize Project Apr 2022 – Dec 2022

Contract / Freelance • LinkedIn-style Professional Platform

- Constructed a full-featured social platform backend utilizing PHP Laravel MVC, Eloquent ORM, and MySQL schema design.
- Implemented asynchronous job queues, event listeners, transactional email notifications, and AJAX API routes with dynamic Blade views.

EDUCATION

Amirkabir University of Technology (Tehran Polytechnic) Tehran, Iran
